PRIMULA POLYANTHUS

One year plants, 35c each, 3 for \$1, except where otherwise priced. Florets on most of these, where well grown, measure size of a silver dollar or larger.

APPLE BLOSSOM:

Wide pink border, shading lighter to center of yellow.

BLUE BOY:

Rich velvety blue, deep orange center. Largest size bloom, very free flowering.

CHIEF SHELTON:

Late blooming, orange bronze.

CHRISTMAS CAROL:

Winter blooming, rich carmine rose. *Each 50c*

FLICKER:

Yellow, edged and flamed with red.

MARY BROWN STEWART:

Yellow shading from center with rich apricot.
Very late. *Each \$1*

MARY DUNN:

Deep blue, late, of heavy substance and good stem.

ORANGE GLOW:

Deep yellow with wide center of orange. Well ruffled and richly fragrant.

PURPLE KING:

Strong shade of true purple, rare color in primroses.

PINK ANGEL STRAIN:

These range thru shell pink, soft "old pink," golden pink and pale rose. Rare and choice.
Each 50c

VIKING:

Early red, large and strong.

WHITE RUFFLES:

Very free flowering, well ruffled and pure white.
Long blooming period.

WINTER SKY:

Bright clear blue, very early, vigorous grower.
Blooms thru entire season.

PRIMULA POLYANTHUS: Unnamed.

Mixed or assorted in color, 5 for \$1; 11 for \$2.

These are good single crown plants. All are from good strains and the color variations are endless. State your color preference in ordering.

PRIMULA ACAULIS:

Each 25c; 5 for \$1. These should be used where flat effect is desired — as for bordering a “primrose path” or bed of perennials. We can furnish them in rose pink, bright rose, yellow, white, blue, carmine.

PRIMULA ACAULIS: Double flowered.

Double lavender Each 35c

Double white Each 50c

Double yellow Each \$1

Hybrids of Primula Juliae

JULIAE Each 35c

JULIAE hybrid LODGE. Small, compact, but a thrifty grower. Small but numerous flowers of rich crimson. *Each 35c*

JULIAE hybrid WANDA. If well grown and placed to get the full sun of early spring, WANDA is glorious. On a gentle slope just south of a huge apple tree, which provides the necessary summer shade, and with rocks between and south of the plants, to retain moisture, has been found an ideal setting for it. *Each 35c*

JULIAE hybrid H. BARNES. Rich redish purple, very late to bloom. *Each 50c*

JULIAE hybrid LITTLE GEM. Rosy red; a strong grower but a lovely thing for the cool nook on a rock garden. *Each 50c*

PRIMULA AURICULA:

Nearly all may be called “half tones” or pastel shades. Some are “grayed” in tone but all are very beautiful. We can furnish them in bronze shades, ivory, pinkish, brown, wine, carmine to mahogany, rich deep purple, royal blue, etc. *Each 35c to 35c*

Clear yellow Each 50c

Blue shades Each 35c to \$1

Prices are post paid, cash with order plus 2% for sales tax from Washington buyers.

If order amounts to less than \$1 please add 5c per plant.

If further particulars are desired, please write us.
